- Field-Ready Solutions for Low-Tech Environments
- API Integration (Salesforce, Google, Microsoft 365, HubSpot)
- Real-Time Dashboards (Power BI, Looker, Matplotlib, Seaborn)
- RAG Chatbot Development (Internal SOP/FAQ Support)
- Cloud Automation (Google Cloud & Microsoft Azure)
- Cross-Cultural User Training
- Positive Reinforcement Coaching

EDUCATION

B.S., Business Administration
University of North Florida

SUMMARY

Technologist Resilient, mission-driven technology leader with over 15 years of experience designing scalable, automation-first solutions across finance, logistics, and nonprofit sectors. Adept at transforming disordered, high-pressure environments into structured, insight-rich systems using tools like Python, Excel VBA, Microsoft Access, and cloud-based platforms. Passionate about serving where needs are greatest-supporting missionaries, ministries, and field responders through technology that empowers. Recognized for integrating technical excellence with a servant leadership mindset.

PROFESSIONAL EXPERIENCE

Founder | DAMgoodData
Remote April 2024 – present

- Launched DAMgoodData with a mission minded purpose: to serve faith-based organizations and missionaries by offering pro bono or low-cost data automation solutions.
- Partnered with Grant Hayes of Global Frontier Missions to rebuild internal reporting for missionary field staff, improving operational visibility and support.
- Helped local missionary run businesses optimize their operations—channeling increased efficiency into direct support for missions in South America.
- Delivered solutions to a variety of clients, including the Center for Educational Reform, the Yass Group, and New York Public Schools—where I developed swim meet management software to streamline event operations.
- Built secure, scalable systems using Excel/VBA, Access, and Python for organizations with limited technical infrastructure and diverse user bases.
- Developed cloud workflows using Google Cloud, Azure, and API integrations to enable real-time automation, reporting, and collaboration across teams.
- Engineered Retrieval Augmented Generation (RAG) chatbots trained on internal SOPs, FAQs, and user guides—empowering teams to self-navigate processes, reduce onboarding time, and enhance confidence in new tools and systems.

Senior Merchandising Financial Analyst
Floor and Decor, Atlanta, GA |March 2021 – April 2024

- Revamped data pipelines using Python and Java for 50% faster processing.
- Consolidated fragmented reports into centralized Power BI dashboards.
- Built a Flask web app for internal workflow automation, reducing manual data entry errors and improving turnaround time.
- Spearheaded a freight claim automation tool using Power Apps and API integration, cutting claim resolution time by 60%.

HOBBIES & INTEREST

Avid rock climber with a love for the outdoors—often working remotely from national parks and climbing destinations across North America

Passionate about hiking, backpacking, and the kind of deep problem-solving that both nature and code inspire

Enjoy surfing and exploring new landscapes, driven by a curiosity for adventure and creation

Above all, I love sharing the hope of Jesus Christ with others through conversation, action, and service

PROFESSIONAL EXPERIENCE (CONT.)

Supply Chain Reporting Manager
Floor and Decor, Atlanta, GA |June 2016 – March 2021

- Led the design of company-wide business intelligence infrastructure.
- Implemented activity-based freight cost tracking aligned with sales activity.
- Developed a warehouse relocation system with FTZ-compliant chain-of-custody documentation.
- Transitioned all reporting from Excel to Power BI, replacing over 30 manual reports.

Supply Chain Auditor
Southeastern Grocers, Jacksonville, FL |April 2013 – June 2016

- Created cost comparison tools that uncovered $2.3M in unpaid rebates.
- Managed promotions logistics with third-party vendors, optimizing delivery and budget performance.

Regional Logistics Manager
Interline Brands Inc, Jacksonville, FL |August 2007 – November 2012

- Restructured regional shipping routes to save $93K annually.
- Built a parcel claims process that recaptured $120K+ per year.
- Designed and implemented a Proof of Delivery system and Electronic BOL tool to ensure fulfillment transparency.

HR Supervisor / Operations Supervisor
UPS, Jacksonville, FL |October 2003 – May 2007

- Handled high-volume hiring and onboarding.
- Supervised dispatch operations and participated in regional rollout of PAS dispatch software.
